LUMECCA™

SKIN RENEWAL & CLARITY

**Clear, Repair &
Rejuvenate
Your Skin in 1-3 Sessions**
(Compared to 4-6 with other IPL Treatments)

THE ULTIMATE SOLUTION TO REJUVENATE YOUR SKIN!

Discover a superior solution to improve skin complexion, reduce skin irregularities and look years younger.

“*I would definitely recommend Lumecca. I like how it brightened my face and gave me a beautiful glow. I can really see a difference.*

PAMELA, LUMECCA CLIENT ”

WHAT IS LUMECCA?

Lumecca is the most powerful intense pulsed light (IPL) to treat pigmented and vascular lesions. After use, patients notice significant improvements in the complexion and clarity of the skin. Lumecca operates using photothermolysis, which provides a photofacial through the delivery of a comfortable light treatment.

WHAT ARE THE BENEFITS?

In just 1-3 sessions Lumecca improves the appearance of:

- Age spots (red/brown pigmentations)
- Sun damage
- Vascular lesions (spider veins, port wine stains, leg telangiectasias)
- Rosacea (redness)
- Freckles

WHAT AREAS CAN BE TREATED?

Lumecca can be used on all areas of the body. The most common areas of treatment are zones that are regularly exposed to the sun. These often include the face, neck, décolletage, legs, hands and arms.

WHAT STEPS MUST BE TAKEN BEFORE THE PROCEDURE?

Avoid direct, excessive sun exposure or tanning one month prior to treatment.

WHAT SHOULD I EXPECT DURING AND AFTER LUMECCA?

During treatment there will be a bright flash of light from the Lumecca that feels like a light elastic sensation. Redness and a slight warming of the skin are normal after treatment and usually subsides within an hour. Over the next 24-48 hours you may see a darkening of pigmented spots; in the week afterwards the pigmented lesions flake off, leading to an evening out of skin tone. After treating vascular lesions you may see the vein blanch and disappear or a color change in the vessel which dissipates after a few days.

HOW MANY SESSIONS ARE REQUIRED?

An improved skin appearance can be noted after the first session and multiple sessions provide even better results. Treatment regime's depend on the severity of skin damage, type of treatment (vascular vs sun damage) and energy settings.

HOW QUICKLY WILL I SEE RESULTS?

Sun damage and skin complexion results can be seen a few days after the first session. The skin will continue to look younger and more brilliant over time with most visible results after 1-2 weeks. Having multiple photofacial sessions will improve the final result. For vascular treatments such as spider or leg veins, results can be seen immediately in up to 2 weeks.

ARE THERE ANY SIDE EFFECTS?

Most patients do not experience any side effects and any skin reaction usually resolves within a few hours. Patients may find they are sensitive to sunlight immediately after treatment. It is recommended to avoid direct sunlight and tanning.
